Child Behavior

Children with emotional and behavioral problems tend to spend longer periods of time in care, experience more placement disruptions, and are less likely to be reunited with their family of origin. The NOM has not yet begun collecting data in this area, but a follow-up study is being conducted for monitoring outcomes related to child emotional and behavioral problems: (1) document the specific problems identified in children using CI52008 code; (2) track the resolution of children with emotional and behavioral problems to a reference to specialized care; (3) document the specialized care completion rate; and (4) completion rate of information documented by the specialized care. All Baltimore are lacking the resolution of the changed data (the Vo. in General), since Ad. a. one indicator of behavioral problems.

PERMANENCE

Out-of-Home Placement

While out-of-home placement is necessary for children who, for safety and developmental need, cannot be safely home, considerable effort is made to ()36 2(()36 2(()36 2(()36 2(()36 450 c. 1 .04.m:)10()351-2(the id0 c. 1h50 c. / 1_11 f10 0 0 1
