New Plenary Session Announced!

Judy Cameron, Professor of Psychiatry and Director of Science Outreach at the University of Pittsburgh, is coming to Calgary for this year's Conference! Dr. Cameron brings a wealth of knowledge and research on the neurobiology of childhood adversity and its implications for adult mental health, and we're delighted to have her present on How Life Experiences Shape Brain Development and Why Does It Matter?

Oral Presentation Highlights

The CCMHC Conference features over 50 concurrent presentations including:

- x Mental Health Supports for Teen Parents Project
- x Designing Models for Rapid Access to Youth Mental Health Services in Canada

x Understanding Cli
