

Specific Learning Outcomes based on Essential Competencies & Entry-to-Practice Milestones:

Following attendance and active participation in lectures, labs, CRW and clinical site visits, the student will begin to demonstrate the following essential competencies for physical therapy practice, for a clientele with previously diagnosed conditions affecting the musculoskeletal system. The student will also have progressed toward the following entry-to-practice milestones, in the context of the topics discussed in this course.

Physiotherapy Expertise:

- Employ a client-centered approach.

 - Act in a manner that respects client uniqueness, diversity and autonomy, and is in the client's best interest.

 - Provide the client with relevant information throughout care.

 - Actively involve the client in decision-making.

 - Empower client to engage in his / her own care.

 - Build and maintain rapport and trust with the client.

 - Ensure ongoing, informed client consent.

- Ensure physical and emotional safety of client.

 - Identify client-specific precautions, contraindications and risks.

 - Employ safe client handling techniques.

 - Apply assessment and intervention procedures in a manner that enhances the client's safety and comfort.

 - Monitor and respond to client's physical and emotional state throughout care.

 - Identify and respond to near misses and adverse events.

- Conduct client assessment.

 - Interview client to obtain relevant information about health conditions, and personal and environmental factors.

 - Determine client's expectations, and their relevance to physiotherapy.

 - Identify comorbidities that impact the approach to assessment.

 - Identify urgent health conditions that require immediate attention and take appropriate action.

 - Identify non-urgent health-related conditions that may benefit from referral to other services, and advise client accordingly.

 - Select and perform appropriate tests and measures.

- Establish a physiotherapy diagnosis and prognosis.

 - Interpret assessment findings and other relevant information.

 - Identify client's body structure and function impairments, activity limitations and participation restrictions.

 - Develop a physiotherapy diagnosis.

 - Develop a working prognosis.
