1 About the Faculties

The B.A. & Sc. is an interdisciplinary degree intended for students who want to pursue simultaneously a program offered by Arts and one offered by Science. The B.A. & Sc. is intended for students with well-defined interdisciplinary interests, and is not meant as a "compromise" between a B.A. and a B.Sc. degree. If you are more interested in Arts, but would like to study some Science, you can do so within the B.A. & Sc. Similarly if you are more interested in Science, but would like to study some Arts, you can do so within the B.A. & Sc. degree.

To learn more about the Faculty of Arts, see [Faculty of Arts > The Faculty > : About the Faculty of Arts](#). To learn more about the Faculty of Science, see [Faculty of Science > The Faculty > : About the Faculty of Science](#).

2 Programs and Teaching in Arts and in Science

Programs and teaching in Arts are described in [Faculty of Arts > The Faculty > : Programs and Teaching in Arts](#). Those in Science are described in [Faculty of Science > The Faculty > : Programs and Teaching in Science](#). The two faculties jointly offer the B.A. & Sc., so students pursuing that degree are at home in both Arts and Science.

3 About the Bachelor of Arts and Science (Undergraduate)

In September 2005, the Faculties of Arts and of Science introduced the Bachelor of Arts and Science, so students pursuing that degree are at home in both Arts and Science.

3.2 Administrative Officers

For a listing of administrative officers in the Faculty of Arts, refer to [Faculty of Arts > Undergraduate > About Arts \(Undergraduate\) > Administrative Officers](#) and for those in the Faculty of Science refer to [Faculty of Science > Undergraduate > About the Faculty of Science \(Undergraduate\) > Administrative Officers](#). Note that the Director of Advising Services, Science, is responsible for students pursuing a B.A. & Sc.

The B.A. & Sc. Nf

While departmental and faculty advisers and staff are always available to give advice and guidance, the ultimate responsibility for completeness and correctness of course selection and registration, for compliance with, and completion of, program and degree requirements, and for the observance of regulations and deadlines rests with you. It is your responsibility to seek guidance from the SOUSA Office if you have any doubts; misunderstanding or misapprehension will not be accepted as cause for dispensation from regulation, deadline, program, or degree requirement.

To be eligible for a B.A. & Sc., you must fulfil all faculty degree and program requirements as indicated in the following sections:

- [section 5.1 Minimum Credit Requirement](#)
- [section 5.2 Residency Requirement](#)
- [University Regulations and Resources > Undergraduate > Student Records > Grading and Grade Point Averages \(GPA\)](#)
- [section 5.3 Time and Credit Limit for Completion of the Degree](#)
- [section 5.5 Course Requirements](#)

5.1 Minimum Credit Requirement

You must complete the minimum credit requirement for the degree as specified in your letter of admission.

Students are normally admitted to a four-year degree requiring the completion of 120 credits. Advanced Standing of up to 30 credits may be granted if you obtain satisfactory results in the Diploma of Collegial Studies, International Baccalaureate, French Baccalaureate, Advanced Levels, and Advanced Placement tests.

If you are readmitted after interrupting your studies for a period of consecutive years or more, you may be required to complete a minimum of 60 credits and satisfy the requirements of a program. In this case, a GPA will be calculated. The Director of Advising Services, Science, in consultation with the appropriate department, may approve a lower minimum for students who had completed 60 credits or more before interrupting their studies.

If you are readmitted after a period of absence, you are normally subject to the program requirements in effect at the time of readmission.

5.2 Residency Requirement

To obtain a B.A. & Sc., you must satisfy the following residency requirements: a minimum of 60 credits of courses used to satisfy the B.A. & Sc. requirements must be taken and passed at McGill, exclusive of any courses completed as part of the math and science requirements of the B.A. & Sc. Freshman program. At least two-thirds of all departmental program requirements (Multi-track, Honours, Interfaculty) must normally be completed at McGill, not including courses completed in a prior McGill degree. Exceptionally, students in major concentrations or interfaculty or honours programs who pursue an approved Study Away or Exchange program may, with prior approval from both their department and the Director of Advising Services, Faculty of Science, be exempted from the two-thirds rule. In addition, some departments may require that their students complete specific components of their program at McGill.

5.3 Time and Credit Limit for Completion of the Degree

If you need 96 or fewer credits to complete your degree requirements, you are expected to complete your degree in no more than eight terms after your initial registration. If you are a student in the Freshman program, you become subject to this time limit one year after your initial registration. If you need or want to exceed this time limit, you must receive permission from the Director of Advising Services, Science, to continue your studies.

If you are registered in the B.A. & Sc., you are expected to complete the requirements of your program and graduate within 120 credits. You will receive credit for all courses (subject to degree regulations) taken up to and including the semester in which you obtain 120 credits. If you do not remain at McGill beyond that semester, you must also seek permission of the Director of Advising Services, Science. Permission for exceeding the time and/or credit limits will normally be granted only for valid academic reasons, such as a change of program (subject to departmental approval) or part-time status. If permission is granted, you will receive credit only for required and complementary courses necessary to complete program requirements.

5.4 Departmental Programs

If you are pursuing a B.A. & Sc., other than those registered in the Freshman program, you are required to take an approved program (multi-track, honours, joint honours, interfaculty), and to select your courses in each term with a view to timely completion of your degree and program requirements. You must complete one of the program streams described below.

The B.A. & Sc. degree includes an required integrative course (BASC 201, 3 credits), plus electives (10±15 credits).

5.4.1 Multi-Track System

To recognize the diversity of student backgrounds and interests, and the multiple routes to understanding offered by a modern university, the Faculties of Arts and of Science offer a 90-credit multi-track system that includes a major concentration in one faculty complemented by a major concentration in the other faculty (see below):

Option

- Arts Major Concentration (36 credits) + Science Major Concentration (36±38 credits) ([see Section 9 Overview of Programs Offered](#) for a list of programs open to students in the B.A. & Sc.)
 - * Effective September 2013, the multi-track option to complete ~~two~~ minors or ~~two~~ minor concentrations is no longer available. Only one multi-track option remains.

Regulations

- Programs of

must withdraw from the program. If the failed course is a complementary course required by the program, you may choose to replace it with another appropriate complementary course. If you choose to substitute another complementary course for a complementary course in which you received credit for the first course, credit for the first course will still be given, but as an elective. If you repeat a required course in which you received credit, credit will be given only once.

The B.A. & Sc. degree includes a required integrative course (BASC 201, 3 credits), plus electives (10±15 credits).

For a list of all programs available to B.A. & Sc. students, and full details of the course requirements for all programs as well as the locations of departmental advisory offices, program directors, and telephone numbers for further information, see [Section 9 Overview of Programs Offered](#).

5.5.1 Course Overlap

You will not receive additional credit toward your degree for any course that overlaps in content with a course for which you have already received credit at McGill, CEGEP, or another university, or Advanced Placement exams, Advanced Level results, International Baccalaureate Diploma, or French Baccalaureate. It is your responsibility to consult with an academic adviser in the [Arts Office](#), the [Science Office for Undergraduate Advising \(SOUSA\)](#), or the department offering the course as to whether or not credit can be obtained and what exclusion clauses specified in the course description in this publication. Please refer to the following website for specific information about Advanced Standing credits and McGill course exceptions: www.mcgill.ca/students/ams/credit.

Sometimes the same course is offered by two different departments. Such courses are called "double-pre@x" courses. When such courses are offered simultaneously, you should take the course offered by the department in which you are obtaining your degree. For example, in the case of double-pre@x courses CHEM XYZ and PHYS XYZ, Chemistry students take CHEM XYZ and the Physics students take PHYS XYZ. If a double-pre@x course is offered by different departments in alternate years, you may take whichever course best fits your schedule.

Note for Arts Students: Credit for computer courses offered by the School of Computer Science is governed by rules specified in each individual course description.

Note for Science and Bachelor of Arts and Science students

Credit for statistics courses offered by faculties other than Arts and Science requires the permission of the Director of Advising Services, Science, except for students in the B.Sc. Major in Environment, who may take required statistics courses in the Faculty of Agricultural and Environmental Sciences necessary to satisfy their program requirements.

Credit for computer courses offered by faculties other than Science requires the permission of the Director of Advising Services and will be granted only under exceptional circumstances.

For Arts, Science, and Bachelor of Arts and Science students

Credit for statistics courses will be given with the following stipulations:

- Credit will be given for ONLY ONE of the following introductory statistics courses: AEMA 310, BIOL 373, ECON 227D1/D2, ECON 257D1/D2, GEOG 202, MATH 203, MGCR 271, MGCR 273, PSYC 204, SOCI 350.
- Credit will be given for ONLY ONE of the following intermediate statistics courses: AEMA 411, ECON 227D1/D2, ECON 257D1/D2, GEOG 351, MATH 204, PSYC 305, SOCI 461, with the exception that you may receive credit for both PSYC 305 and ECON 227D1/D2 or ECON 257D1/D2.
- Students who have already received credit for MATH 324 or MATH 357 will NOT receive credit for any of the following: AEMA 310, AEMA 411, BIOL 373, ECON 227D1/D2, ECON 257D1/D2, GEOG 202, GEOG 351, MATH 203, MATH 204, MGCR 271, MGCR 273, PSYC 204, PSYC 305, SOCI 350.
- For 500-level statistics courses not listed above, students must consult a program adviser to ensure that no significant overlap exists with a course for which the student has already received credit. Where such overlap exists with a course for which the student has already received credit, credit for the 500-level course will not be allowed.
- PSYC 204 may not be taken if a grade of 75% was received in an equivalent course completed at CEGEP.

5.5.2 Courses Outside the Faculties of Arts and of Science

The following regulations apply to students in the B.A. & Sc. who want to take courses outside the faculties of Arts and of Science:

- Regardless of your minimum credit requirements for your B.A. & Sc., you are allowed a maximum of 12 credits in ELECTIVE and/or COMPLEMENTARY courses taken in faculties other than the faculties of Arts and of Science.
- Students in certain designated programs that include a number of REQUIRED and COMPLEMENTARY courses in other faculties are permitted a maximum of 30 credits outside the faculties of Arts and of Science. These programs are the Interfaculty and Honours programs in Environment, the Minor concentration in Environment, the Interfaculty and Honours programs in Sustainability, Science and Society, and the Major concentration in Geography (Urban Systems).
- Any courses taught at McGill University may be used toward the maximum allowed, except for courses taught by the School of Continuing Studies, for which you receive credits only in Continuing Studies. Courses taught by the McGill Learning Centre are excluded from this rule and can count for credit in your degree (see the SOUSA website for a list of approved courses: www.mcgill.ca/science/student/continuingstudents/basc/contd).
- For the purpose of this policy, courses taught in other faculties and specifically listed in [Faculty of Arts > Undergraduate](#) or [Faculty of Science > Undergraduate](#) are considered as courses taught in the faculties of Arts and of Science.
- The maximum number of credits allowed will be strictly enforced.

5.5.3 Distance Education Courses

- A maximum of 6 credits of courses taught through distance education may be used toward the B.A. & Sc. degree at McGill.
- Courses taught through distance education from institutions other than McGill will be accepted for transfer credits under the following conditions:
 - the course is given by a government-accredited, degree-granting institution

Multi-Track System

You complete 36 credits of Arts courses, 36±38 credits of Science courses, and a required core course (ASC 201, 3 credits). You can combine an Arts major concentration with a Science major concentration (36±38 credits). Additional guidelines for the multi-track system can be found [here](#).

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Program Applications to do a Joint Honours program in English and another subject in the Faculty of Arts should be submitted once a minimum of 9 credits, and no more than 18 credits have been completed in English. There are normally two possible application dates for Joint Honours in English: either by the end of January (by which time the first-term courses are completed and the grades available), or at the same time as the Honours application date, typically in mid-April. (Only students who will have completed more than 18 credits in English by the end of January may apply.) Applications will be considered by the Department's Honours Committee on the basis of the student's program and a minimum of 3.50. The application form is available in the Department's General Office (Arts 155), and the specific submission requirements are described by that form.

The maintenance of a 3.50 program average is required for continuation in Joint Honours. Graduation with Joint Honours requires a minimum program average of 3.50, a minimum program average of 3.50, and a minimum mark of B+ on the Honours Essay. Graduation with First Class Joint Honours in English requires a minimum program average of 3.50, a minimum program average of 3.70, and a minimum mark of A on the Honours Essay.

Each academic year there is a special adviser for Joint Honours students, and the receptionist in the General Office can provide a name and contact information. The Department's website <http://www.mcgill.ca/english/> provides additional information on the Joint Honours program and applications, and this website should also be consulted prior to contacting the adviser.

ENGL 370	(3)	Theatre History: The Long Eighteenth Century
ENGL 371	(3)	Theatre History: 19th to 21st Centuries

(In very rare cases, a third alternative may be approved at the discretion of the Joint Honours Adviser, but only when it is formally recommended for the joint subject according to the description of that Joint Honours program found in the section of the eCalendar. For example, Joint Honours with Anthropology allows the option of combining 3 credits of essay work with 3 credits in the joint subject to create a joint essay.

10.19.4 Bachelor of Arts (B.A.) - Minor Concentration Health Geography (18 credits)

There is increasing consensus around the idea that health is not just a function of individual characteristics but an interaction between the characteristics of the individual and the environments, both physical and social, to which one is exposed over a lifetime of daily living and working. Health outcomes are dramatically influenced by physical and social characteristics of places both within and between countries and this knowledge for our understanding of the factors that might be modified to improve the health of large groups of people. The B.A.; Minor Concentration in Health Geography introduces students to both local and global health issues and provides a skill set in spatial and statistical analyses used to describe health outcomes in populations.

Complementary Courses (33 credits)

33 credits selected from the areas of History course lists (The Americas, Europe, Asia/Africa/Middle East, and Global/Thematic) with the following stipulations:

A maximum of 12 credits at the 200 level or lower.

A maximum of 27 credits in any one of the areas.

A minimum of 6 credits of Honours seminars (these are listed with their thematic area). Each Honours seminar comprises a 6-credit course with a D1/D2 course number or two 3-credit courses to be taken consecutively. The second term component includes the completion of a major research paper based substantially on primary-source research. (The first term 3-credit courses may be taken alone in exceptional circumstances, but in that case will be counted towards the complementary course component of the program only and will not be counted as an Honours seminar.)

Students in a Joint Honours program may, under exceptional circumstances and with the written approval of a program adviser, count up to 3 credits of language training toward their Honours program in History if this training is pertinent to the student's academic program and is required to demonstrate knowledge of a language directly related to the student's area of specialization.

3 non-HIST credits pertinent to historical studies may be counted toward a Joint Honours program in History with written approval of a program adviser. Faculty regulations stipulate that such courses must not be double-counted between programs.

Students must maintain a 3.30 grade point average in their program courses and must receive no less than a "B" in any program course. In addition, and in accordance with Faculty of Arts rules, students must maintain an overall CGPA of 3.00.

In all cases, students should see an adviser to plan a program that suits their needs. Please consult the Department website for the most up-to-date list of course offerings for the current academic year.

Stream 1: Economic Development and Living Standards

Stream 3: Culture and Society

Stream 4: Environment and Agricultural Resources

Stream 1: Economic Development and Living Standards

Experience has shown that development requires economic growth and is shaped by the distribution of economic resources. At the same time, the globalized economy has created new opportunities and new challenges for sustained growth. Courses in this stream revolve around the factors contributing to sustained economic growth, the trade-offs associated with different ways of achieving it, and the distributional issues development inevitably raises. More generally this stream is also concerned with understanding what "development" actually entails in different contexts.

The courses in this stream focus on the social structures, history and culture of populations and developmental processes. Associations, class, gender, religion, race, and ethnicity, for example, all shape development in multiple and diverse ways. Moreover, present developmental processes oftentimes cannot be adequately understood without considering history. Culture, in turn, is increasingly recognized within development studies as both a determinant and a constitutive element of development. In exploring all three, the courses in this stream provide important insight into the complex and varied relationship between social context and development.

Stream 3: Culture and Society

The courses in this stream focus on the social structures, history and culture of populations and developmental processes. Associations, class, gender, religion, race, and ethnicity, for example, all shape development in multiple and diverse ways. Moreover, present developmental processes oftentimes cannot be adequately understood without considering history. Culture, in turn, is increasingly recognized within development studies as both a determinant and a constitutive element of development. In exploring all three, the courses in this stream provide important insight into the complex and varied relationship between social context and development.

Within development studies, the environment has long been recognized as a vital determinant of development. More recently many scholars have changed their environmental focus to emphasize sustainability. The courses in this stream recognize both: some courses consider how the environment can be exploited to promote human well-being while others consider how the environment must be respected to render development sustainable. Together they highlight the delicate balance that must be attained between humans and environments to maximize possible sustainable livelihoods.

Streams

Stream 1: Economic Development and Living Standards

Stream 2: States and Governance

Stream 3: Culture and Society

Stream 4: Environment and Agricultural Resources

Stream 1: Economic Development and Living Standards

Experience has shown that development requires economic growth and is shaped by the distribution of economic resources. At the same time, the globalized economy has created new opportunities and new challenges for sustained growth. Courses in this stream revolve around the factors contributing to sustained economic growth, the trade-offs associated with different ways of achieving it, and the distributional issues development inevitably raises. More generally this stream is also concerned with understanding what "development" actually entails in different contexts.

The courses in this stream focus on how political institutions shape developmental processes. Some courses analyze states and recognize how they promote development by providing diverse developmental goods while others impede development by preying on their peoples. Other courses focus on elites and consider how political rights and participation, or their absence, affect developmental processes. Finally, several courses consider factors that make possible effective states and regimes.

10.28 Mathematics and Statistics (MATH)

The Department of Mathematics and Statistics, the discipline, and specific courses are described in [Faculty of Science > Undergraduate > Browse Academic Units & Programs > : Mathematics and Statistics \(MATH\)](#).

10.28.1 Bachelor of Arts (B.A.) - Minor Concentration Mathematics (18 credits)

The Minor Concentration Mathematics is offered in two versions: an expandable version, for students who wish to keep the option of expanding the program into a Major Concentration Mathematics, and a non-expandable version for students who know on entry into the Minor that they do not wish to expand it into a major concentration.

The Minor Concentration Mathematics may be taken in conjunction with a major concentration in some other discipline under the Multi-track System. Students planning on taking the Major Concentration Mathematics and the Minor Concentration Mathematics as part of Multi-track option C should select the Supplementary Minor Concentration in Mathematics in place of this Minor concentration.

Under option C, it is not possible to combine the Minor Concentration Mathematics and the Minor Concentration Statistics. Students wishing to do this should instead take the Major Concentration Mathematics under option B (major concentrations) and select a number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

No overlap is permitted with other programs.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 18 credits required for the program.

The Minor Concentration Statistics may be taken in conjunction with a major concentration in some other discipline under ~~Option~~ the Multi-track System, or together with the Major Concentration Mathematics and a minor concentration (which must be in some other discipline than Mathematics) under option C.

Under option C, it is not possible to combine the Minor Concentration Statistics and the Minor Concentration Mathematics. Students wishing to do this should instead take the Major Concentration Mathematics under option B (the major concentrations) and select a number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

10.30 Physics (PHYS)

The Department of Physics, the discipline, and specific courses are described in the [Faculty of Science > Undergraduate > Browse Academic Units & Programs > : Physics \(PHYS\)](#)

10.30.1 Bachelor of Science (B.Sc.) - Minor Physics (18 credits)

The 18-credit Minor permits no overlap with any other programs. It contains no Mathematics courses, although some of the courses in it have Math pre- or corequisites. It will, therefore, be particularly appropriate to students in Mathematics, but is also available to any Science student with the appropriate mathematical background.

Students in certain programs (e.g., the Major Chemistry) will find that there are courses in the Minor that are already part of their program, and that they may not take for credit because of a substantial overlap of material with a course or courses in their program. After consultation with an advisor, such students may complete the Minor by substituting another physics course(s) from the Major or Honours/PhD programs.

The Major Concentration Physics, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline. This program is insufficient to prepare a student for professional or graduate physics; students interested in pursuing a career in physics are advised to take the appropriate B.Sc. program in physics.

10.31.2 Bachelor of Arts (B.A.) - Major Concentration Political Science (36 credits)

Complementary Courses (36 credits)

36 credits of courses selected from the four main fields of political science (Canadian Politics, Comparative Politics (Developed Areas and Developing Areas), International Relations, and Political Theory) with the following specifications.

No more than one-half of the credits (18 credits) may be taken in a single field of political science, unless the field is Comparative Politics in which case the maximum is 21 credits, provided courses are taken in both Developed Areas and Developing Areas.

No more than 15 of the 36 credits may be at the 200 level.

In the final year no course used toward the program requirements may be below 300 level.

No more than 12 POLI transfer credits can be used toward the program requirements.

Advising Information

In the first year of the program (U1), students are advised to select 12-15 credits from at least three of the four main fields of political science. U1 students should normally take courses at the 200 level only. However, those who have already completed the 200 level prerequisite for courses may take 300-level courses.

Course lists for each field of political science are provided below.

NOTE: POLI 200, 210, 311 and 461 can also be used in this program.

10.31.3 Bachelor of Arts (B.A.) - Joint Honours Component Political Science (36 credits)

Revision, May 2017. Start of revision.

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours Program components from Arts disciplines.

Prior to registering for each Joint Honours component, students should consult an adviser in each department for advice on course selection and their interdisciplinary research project (if applicable).

To enter, remain and graduate in Joint Honours, students must maintain a 3.3 average in their political science courses and more than half of the political science grades must be at the B level or higher. According to faculty regulations, Joint Honours students must maintain a minimum ACOP 3.00 in general. In addition to meeting these Political Science requirements, students must meet the requirements set forth by the other department.

To be awarded First Class Joint Honours at graduation, in addition to the requirement of a 3.50 CGPA, students must achieve a 3.6 average in their political science courses and more than half of political science grades must be at the B level or higher. All political science courses taken at McGill are counted in determining a student's standing. (The specific criteria are in the brochure "Major and Honours Program Guide", which may be found on the Department website <http://www.mcgill.ca/politicalscience/>). To be awarded Joint Honours at graduation, students must be listed in the Joint Honours program in their final year. At graduation, students' Joint Honours standing will be determined by their record in the Joint Honours program. In addition to meeting these Political Science requirements, students must meet the requirements set forth by the other department.

Students may enter the Joint Honours program in U1.

10.32.4 Bachelor of Arts (B.A.) - Joint Honours Component Psychology (36 credits)

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from both disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Students should note that awarding of the Joint Honours degree will depend on both cumulative grade point average and a minimum grade of B on PSYC 380D1/PSYC 380D2, PSYC 482. "First Class Honours" is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A in the required honours courses (i.e. PSYC 380D1/D2, PSYC 482). "Honours" is awarded to students with a minimum CGPA of 3.00 and a minimum grade of B in the required honours courses.

In addition to the requirements of the Joint Honours Component Psychology, students must also complete all requirements of their other Joint Honours component.

Admission to the Joint Honours component is selective. Students with a cumulative grade point average of 3.00 or higher are eligible to apply. However, normally only students with a U1 CGPA above 3.50 are admitted. Students must complete a minimum of 27 graded credits in their U1 year to be eligible to apply. Once in the Joint Honours component, students must obtain a CGPA of 3.00 in the U2 year in order to continue in the program for U3. Students in the Joint Honours component are encouraged to complete a minimum of 27 graded credits per academic year. This is also the minimum number of credits required to be eligible for fellowships and awards.

Bachelor of Arts and Science students will replace this requirement with 3 credits in Psychology at the 100 level.

Stream II - Indo-Tibetan Languages

Sanskrit is the language of classical Indian civilization and is recommended for students interested in gaining access to religious texts, philosophical works, academic treatises on all subjects, and poetry written in classical and vernacular.

Classical Tibetan is one of the main scriptural languages of Buddhism. Most originally composed in Sanskrit are only available in their Tibetan translations, and a vast body of philosophical, devotional, poetic and academic works composed in Classical Tibetan is only accessible to one who has a firm grasp of the language.

Tamil is a language spoken by over 75,000,000 people around the world. It is an ancient South Indian language that, like Sanskrit, has a vital living tradition. It has a classical literary canon and yet is also part of the everyday lives of millions of people.

10.36.4 Bachelor of Arts and Science (B.A. & Sc.) - Honours in Sustainability, Science and Society (60 credits)

The grand challenge of the 21st century is sustainable well-being; that is, to improve human well-being while maintaining the Earth's life-support systems. This B.A. & Sc. program provides the interdisciplinary and integrative knowledge and skills required to effectively understand and address this challenge in its multiple dimensions—scientific-technological, socio-economic, political-institutional, ethical, and human-cultural—and to chart a transition to sustainability. It is built upon three pillars: 1) Science and Technology to provide an in-depth understanding of the underpinnings of the problems of concern along these dimensions; 2) Economics, Policy and Governance, to understand how we can make the sustainability transition; and 3) Ethics, Equity and Justice, to discuss why we need change, and the issues of equity and justice associated with taking this transition program is a partnership between Geography and the MSE and will be administered through Geography.

The Honours program allows students to pursue a research project with the supervision of a McGill University faculty member leading to an honours thesis. Applicants must have a minimum program GPA (GPA of all required and complementary courses at McGill) of 3.3 to enter the Honours program. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495, 6 credits). Students are required to achieve an overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours. Honours students need to identify a supervisor for their honours project, and register in ENVR 495. Honours students are encouraged to participate in 606 seminars with graduate students.
